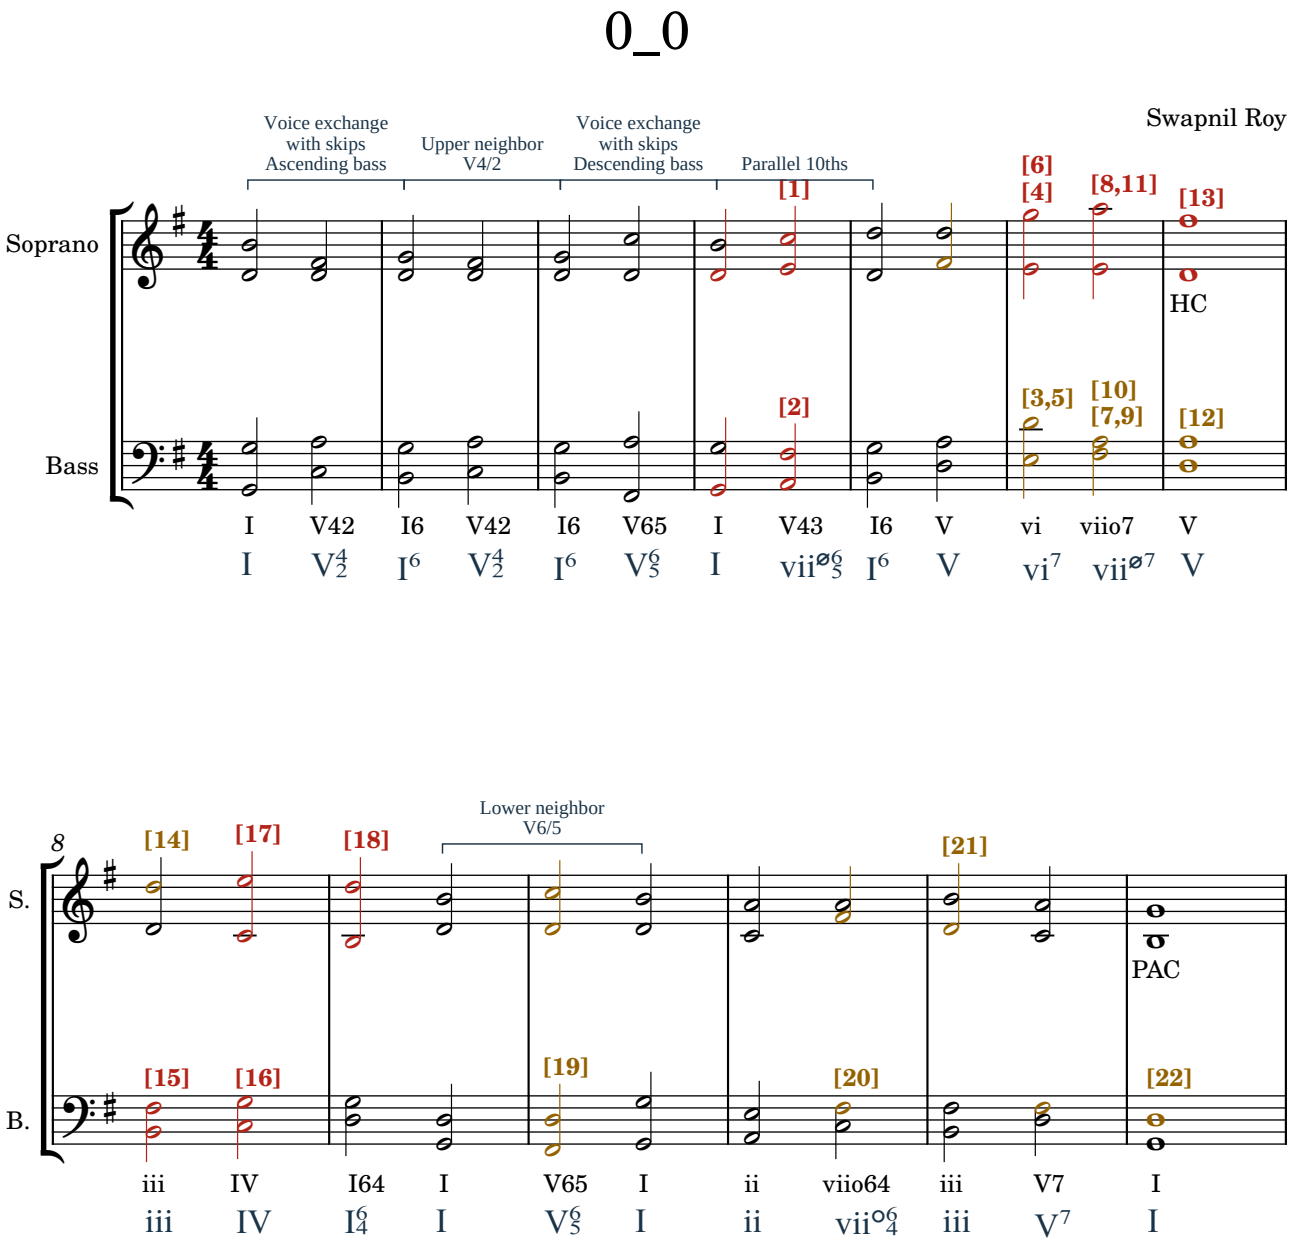
Red: notes involved in errors. **Amber**: advisory findings. Numbered labels refer to the notes below. A red note may also have advisory findings.



Roman numeral corrections

m. 4, beat 3: V43 -> viiø6/5. Exact match to the complete spelled pitch set.

m. 6, beat 1: vi -> vi7. Root, third and seventh are present; fifth is omitted. Contextual interpretation.

m. 6, beat 3: viio7 -> viiø7. Root, third and seventh are present; fifth is omitted. Contextual interpretation.

m. 10, beat 1: V65 is defensible as V6/5 with its fifth A omitted.

Other supplied chord labels match the reviewed complete pitch sets or the stated incomplete-chord interpretations.

m. 7, beat 1, HC: A root-position dominant ending supports the marked half cadence.

m. 13, beat 1, PAC: Root-position V-I with tonic in the soprano supports the marked perfect authentic cadence.

Local option at m. 4, beat 3: change alto E4 to D4 if V4/3 and the source passing-bass paradigm were intended. This restores V4/3 and removes 1 supported voice-leading error(s), with no newly detected hard-rule errors in a full recheck. Other score issues remain; this is not a certified full revision.

Paradigms and phrase structure

Voice exchange with skips ascending bass: m. 1 b. 1 to m. 2 b. 1: Variant of Voice exchange with skips ascending bass; bass degrees [1, 4, 3], soprano degrees [3, 7, 1]. The starred source requires soprano [3, 1, 1]; this realization does not match it. Reference printed p. 12, figure 12a.

Upper neighbor with V4/2: m. 2 b. 1 to m. 3 b. 1: Matches the harmonic/bass scheme of Upper neighbor with V4/2; bass degrees [3, 4, 3], soprano degrees [1, 7, 1]. Reference printed p. 12, figure 8.

Voice exchange with skips descending bass: m. 3 b. 1 to m. 4 b. 1: Variant of Voice exchange with skips descending bass; bass degrees [3, 7, 1], soprano degrees [1, 4, 3]. The starred source requires soprano [1, 3, 3]; this realization does not match it. Reference printed p. 12, figure 12b.

Parallel 10ths: m. 4 b. 1 to m. 5 b. 1: Variant of Parallel 10ths; bass degrees [1, 2, 3], soprano degrees [3, 4, 5]. The middle chord is viiø6/5, not the source's V4/3. Outer thirds are octave-displaced from the source's tenths. Reference printed p. 12, figure 10.

Lower neighbor with V6/5: m. 9 b. 3 to m. 10 b. 3: Matches the harmonic/bass scheme of Lower neighbor with V6/5; bass degrees [1, 7, 1], soprano degrees [3, 4, 3]. The middle seventh chord omits its fifth, so the voicing differs from the source diagram. Reference printed p. 12, figure 5.

m. 8 beat 1 to m. 9 beat 3: iii-IV-I6/4-I resembles the iii-to-IV connection in printed p. 14, figure 9, but lacks its opening I and adds I6/4. It is a fragment/variant, not a full source match.

m. 9 beat 1: I6/4 is correctly spelled, but this is not the standard cadential 6/4-to-V over a held dominant bass. Review the intended tonic-expansion function.

Other passages were not confidently named from the supplied paradigms. Matching a few numerals alone is insufficient; required soprano lines and bass motion matter.

Findings and explanations

[1] ERROR m. 4, beat 3 - parallel fifth
A and B move in the same direction between perfect fifths.
A D4 (m. 4, b. 1); B G2 (m. 4, b. 1); A E4 (m. 4, b. 3); B A2 (m. 4, b. 3)

[2] ERROR m. 4, beat 3 - roman numeral
